When you are out of office using Public Wi-Fi- e.g. in office meeting rooms, home or a coffee shop or while accessing a sensitive application, our company policy requires you to use additional authentication factor called Multifactor authentication(MFA). This provides an additional layer of security for your applications by adding another factor to the sign on process thus protector you, KLN data and network.

Multi-Factors Available:

- **Okta Verify**
- **Google Authenticator**

Open a web browser

1. In the Address bar, type the URL: https://login.kerrylogistics.com/
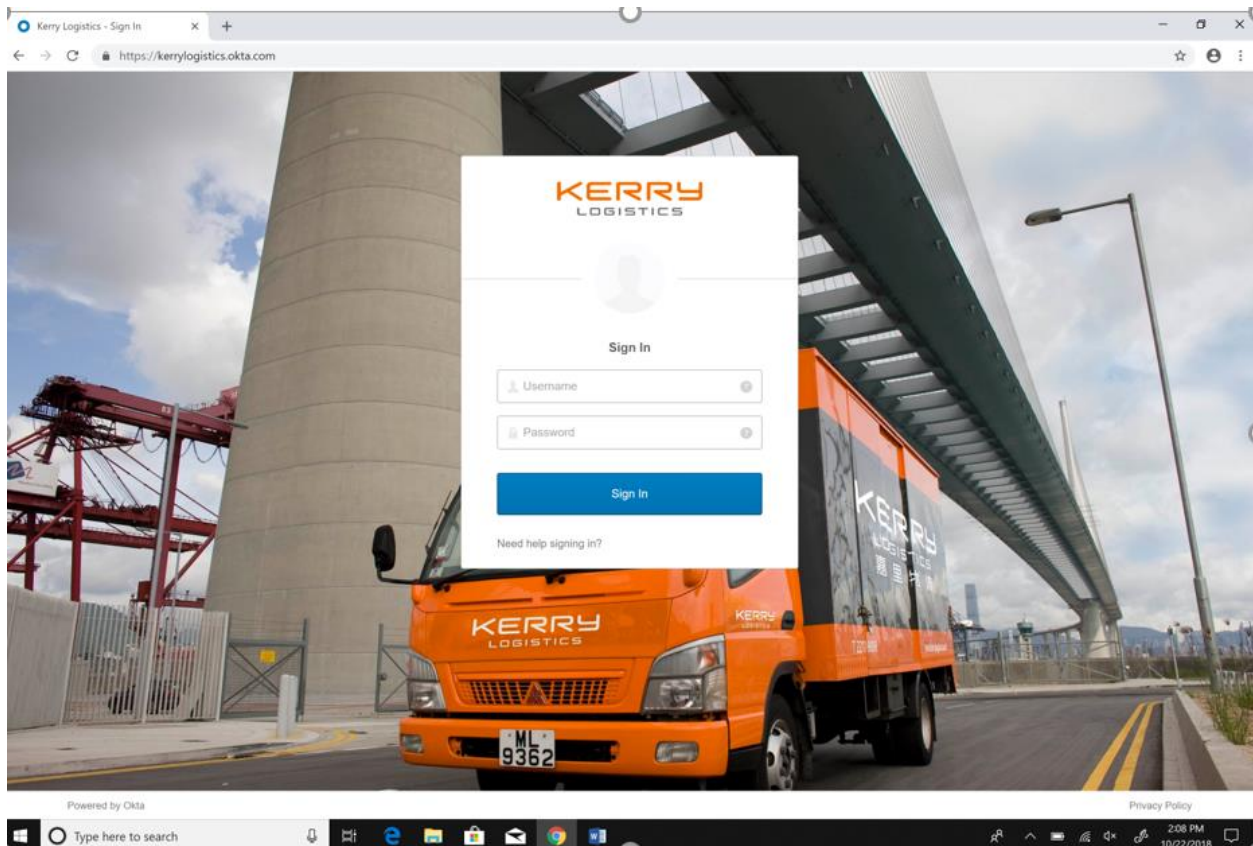

2. Type your Windows username and password and click Sign In.

3. On the Set up multifactor authentication screen, choose your preferred factor and click Setup (we recommend Okta verify)

4. On the Factor Setup screen, click the device type icon.
   Click **Next.**

## Install the Google Authenticator or Okta Verify App

5. On your mobile device, open the app store.

- On an iOS device open the Apple App Store.
- On an Android device open the Google Play Store.

### Open the downloaded app and click Add an Account

6. Hold your device up to the computer screen and scan the barcode.

Click Next

7. To enable self-service for account unlock and password reset, enter below information and click "Create my account"

8. Enjoy the available apps just "one click away"
